

## Improve your listing performance with Dealertrack Inventory and eBay®

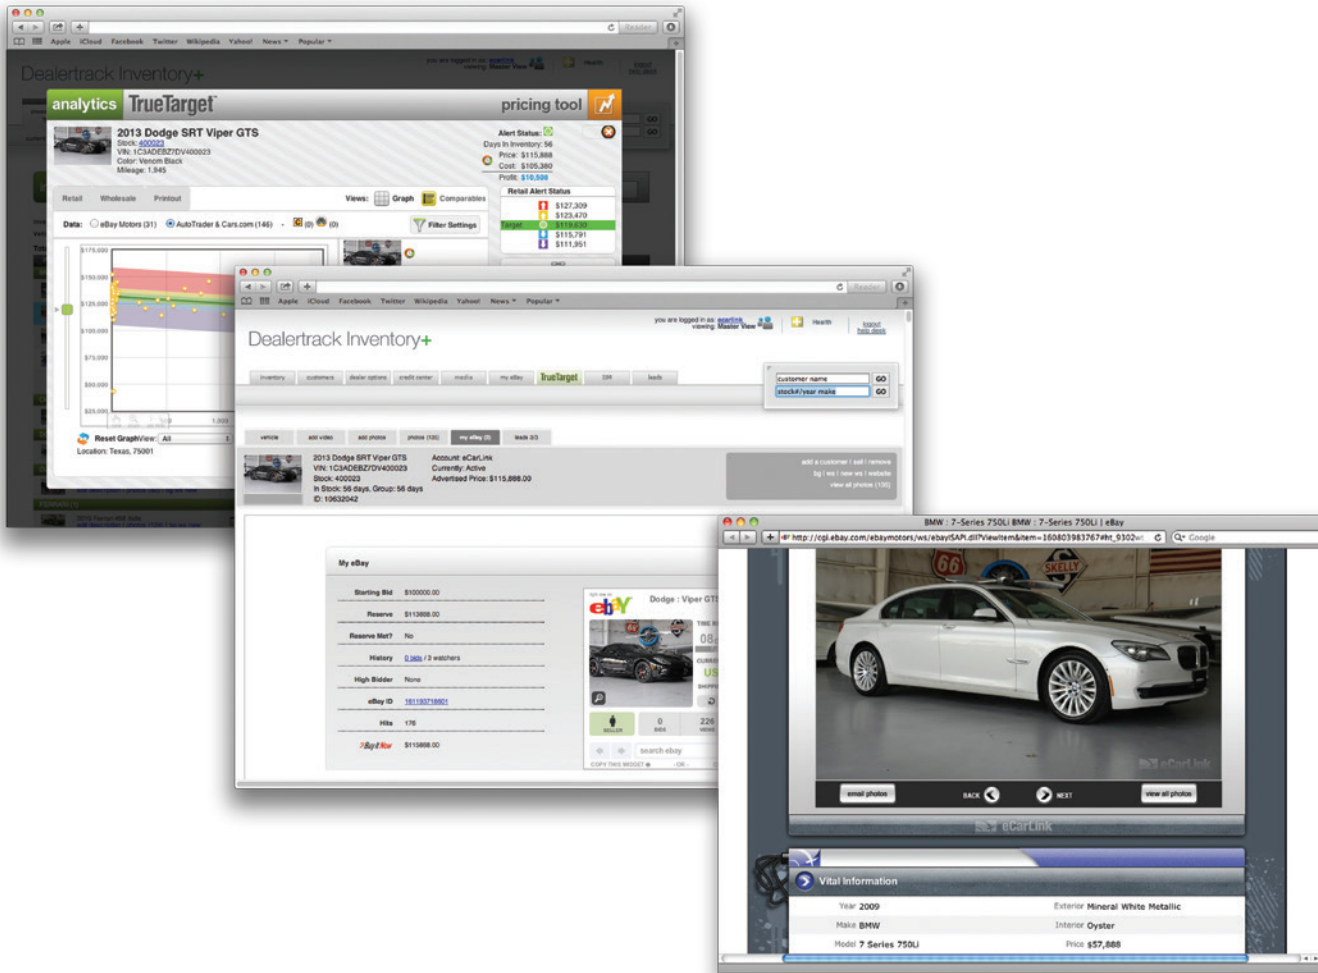

Dealertrack is a preferred provider of eBay®, offering best-in-class listing management to many of the nation’s leading eBay® PowerSellers. Coupled with our professional eBay® specialist team, we help you take your listing performance to the next level.

### Features and Benefits:

- The largest facilitator of vehicles to eBay®, listing on average 4,200 cars a week, double that of our closest competitor.
- Dedicated full-time team of eBay® performance consultants.
- Drive qualified local buyers to your dealership.
- List your entire lot, specifically late-model vehicles, for one low price.

## Features and Benefits:

- Set your defaults under eBay Options, or change these settings on a per-listing basis. Customize each listing type, length and date, or set the defaults and post with just a few clicks.
- Prices will be pulled from the inventory screen, but you have the ability to change them on the listing box. Choose whether to sync this price back to the inventory screen or have this be an eBay price only.
- Choose between 3-, 5-, 7-, 10-, or 21-day auctions, according to eBay's options.
- Set your auction to automatically lower the reserve throughout the duration of your auction to increase interaction with bidders.
